

About Us

FSP-Tech GmbH: Safety showers, eye- and decon-Showers

FSP-Tech was founded in 1995 as a commercial selling agency for safety equipment and has grown steadily to become one of the leading manufacturers of emergency eye-/face washers, safety showers and decon showers. FSP-Tech was founded by Thomas Geier who remains the managing director today.

FSP-Tech offers a complete range of safety- and eye showers according to DIN 12 899-3, DIN-EN 1514-1 / 1514-2 and ANSI Z358.1,

Our highly motivated team is dedicated to our core company principles of:

- Customer focus
- Quality
- Flexibility
- Technical competence

Our team have committed themselves to further continuous professional development.

We are DIN EN ISO 901:2008 certified which ensures robust processes for:

- Product development
- Production
- Maintenance
- Distribution

For safety equipment for industry. These processes are internalised by the whole team.

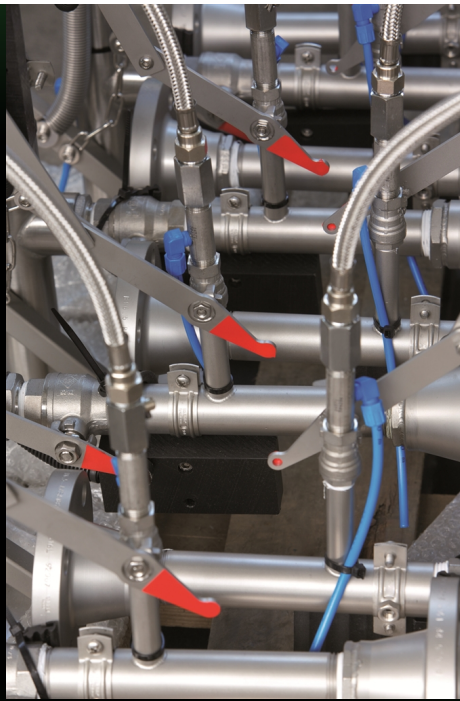

The owner and managing director Thomas Geier is a member of national and international committees and works actively on the improvement of safety shower standards with the aim of creating more user-friendly legislation.

All products shown are designed by FSP-Tech itself in cooperation with industrial designers.

The result of this commitment towards the customer are safety showers and decon systems that are built to protect and serve.

FSP-Tech GmbH: Partner of industry and plant engineering!
