

Decon Showers

Download the latest version of the catalogue concerning decon showers here: [Download](#)

FSP-Tech® manufactures / delivers decon showers for industry and fire brigades.

Decon showers assure effective preliminary cleaning of personal safety equipment before the user takes it off. Users of protective clothing are thus able to prevent accidental contamination transfer, thus safeguarding their health.

Two ranges are available

- Stationary
- Mobile

Stationary decon showers are entirely made of stainless steel in order to assure long service life and easy cleaning. The durable square tube frame is on the outside of the shower cubicle. The inside walls are kept smooth to avoid any build-up of deposits and dirty corners. Our decon showers can be optionally equipped with an integrated catch basin including drain pipe.

Mobile decon showers are often used by fire brigades. They are made out of robust fabric and are easily deployed on site.

Both ranges use special spray nozzles, supplemented by a handheld water spray scrub brush (optional) resulting in highly effective cleaning.

Decon showers are made in Germany.
